

Additive Mechanisms for Interorganizational Network Structures

Jiawei Fu
Agent Based Modeling
EECS 472

How Do Network Mechanisms Interact to Affect Global Structure?

Network Mechanisms	
Homophily	Tendency to select actors similar to oneself
Resource Dependence	Tendency for actors rich in resources to attract connections
Preferential Attachment	Tendency for popular actors to attract more connections
Contagion	Tendency for actors to affect their social networks

Which One is which?
